EstrogenaTest®

Home Test Kit That Measures the Good Estrogen And Bad Estrogen In Your Body

Estrogen metabolism and abnormal cellular function

Estrogen normally stimulates cell division and growth in estrogen-sensitive tissues. Scientists have determined that too much of a certain "bad" form of estrogen plays a role in causing unbalanced cellular division and growth.

The more "good" estrogen you make, the less "bad" and vice versa. The ratio between these two estrogens—called the 2/16A ratio—is critical for healthy hormone function. The good news is it can be positively influenced by things you do every day.

The EstrogenaTest® measures the balance between your "good" estrogen and your "bad" estrogen.

The [EstrogenaTest Report](#) also will tell you if you need the additional support provided by EstrogenaCaps – a special formula of natural ingredients and concentrated Brassica family compounds that can help promote a more favorable 2/16a ratio. Ideal Health will automatically send you a 30-day supply of EstrogenaCaps if your test results indicate a need, and your credit card will be billed in the amount of \$38.20 (Preferred Customer). Then, each month following, five to seven days before your EstrogenaCaps run out, you will automatically receive another 30 day supply, and will be billed \$38.20. **Please note that you will receive EstrogenaCaps only if your test results indicate a need for extra support.** On average, 50% of EstrogenaTest Reports are accompanied by EstrogenaCaps.

IMPORTANT NOTE: The EstrogenaTest is NOT a predictor of cancer, nor does supporting proper estrogen metabolism mean that you will never get cancer or any other disease. Talk to your doctor if you have any concerns.
