Michael & Michelle Burton

When we started in this business we weren't looking to get rich, we were just looking to get by! We had been in the automobile industry and did quite well for many years. We expected that we would always be in the car business. Our thought was that what we had would always be in demand; most everybody needs a car to get around... right? Fortunately, for us, this turned out not to be the case. What seemed like a nightmare, at the time, became our dream come true.

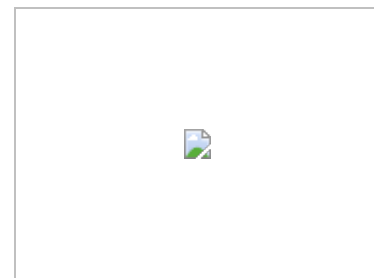

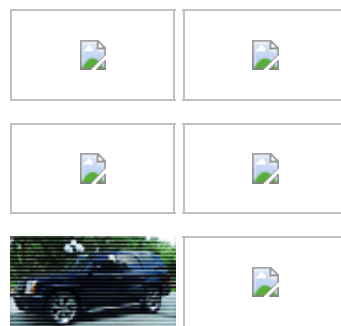

In the months following the closing of our car lots we had NO idea what we were going to do. I had been a stay-at-home-mother for eight years, and I didn't want to re-enter the job market for several reasons. I knew I would need new skills to get paid the amount of money I needed to make and I just couldn't see myself going back to school. However, the main reason was I had been there for our daughter everyday for the last eight years and I was not willing to give that up to go get a job. Michael had no choice but to go get a job that he was over qualified and under paid for. Being a moderately successful business owner in the past, and then having to go work for some one else was an adjustment, to say the least.

Thank goodness someone that knew of our declining financial situation gave us a package of information about a home business, very much like the one we are offering you here on this website. After going through all the information, we decided to go ahead and get started. In no time at all we earned a couple hundred dollars and after several months we were earning a few thousand. We have been in our Work From Home Business for five years now and we are earning more money now than we could ever have dreamed.

Being a home business owner has allowed both of us the time freedom to be here for our daughter and the financial freedom to live an extraordinary lifestyle. One of the best parts about being able to work from anywhere with a laptop and a cell phone is that you get to travel. We love to travel and have been to places that most people only read about. We have been to Hawaii two different times, to Paris twice, and to Canada more times than we can count. We have been to Sweden, Panama City, Panama, the Bahamas, Mexico, and of course all over the United States.

Looking back I wouldn't change anything ... we had to go through what we did to become the people we are and to truly appreciate what we have been given. My hope for you is that you can say the same things for yourself.
